

BEESHUB Multi-Vendor Ecommerce Marketplace

Final Scope & Requirement Confirmation – Phase 1

Document Type: Final Scope and Requirement Confirmation

Project: Multi-Vendor Ecommerce Marketplace

Client Name: Vignesh

Prepared By: Kishoresharma

Document Date: 23-05-2026

Approved Starter Budget: INR 19,000

Expanded Phase 1 Scope Note: Advanced features are now included in Phase 1 and must be reconfirmed with final budget and timeline before development starts.

Document Status: For client confirmation before development starts

1. Document Purpose

This document confirms the final Phase 1 scope for the BEESHUB ecommerce marketplace.

After the client approves this document, the listed Phase 1 features will be treated as the confirmed development scope.

Any extra feature or major change not listed in this document will be discussed and quoted separately.

2. Project Summary

BEESHUB will be a multi-vendor ecommerce marketplace where multiple sellers, vendors, nearby stores, suppliers, and business sellers can register and sell products through one platform.

The platform will support customer shopping, vendor product selling, B2B business enquiries, admin control, mobile app expansion, courier workflow, seller payout flow, and advanced marketplace features.

Phase 1 will include the marketplace website, mobile app scope, vendor/seller tools, B2B workflow, courier/shipping features, payout features, analytics, chatbot, and other confirmed advanced features.

3. Confirmed User Types

- Customer / B2C Buyer.
- Seller / Vendor.
- Nearby Store / Local Shop.
- Business Buyer / B2B Buyer.
- Admin Team.
- Support / Delivery Team, if enabled.

4. Confirmed Phase 1 Website Scope

- Multi-vendor ecommerce marketplace website.
- Mobile-friendly responsive website.
- Customer shopping flow.
- Vendor and seller onboarding.
- Nearby store selling support.
- Product listing and catalogue management.
- Cart and checkout flow.
- Basic order placement.
- Basic order tracking.
- Basic B2B enquiry flow.
- Request quotation option.
- Admin dashboard.
- Seller approval workflow.
- Product management.
- Order management.
- Basic reports.
- Manual commission management.
- Android mobile app.
- iOS mobile app.
- Dedicated seller mobile app.
- Advanced buyer-seller chat.
- Courier API integration.
- Live delivery tracking.
- Automated seller payouts.
- Seller subscription plans.
- Paid seller promotions.
- Advanced B2B RFQ workflow.
- Quotation comparison.
- PO upload workflow.

- B2B approval workflow.
- Special business pricing rules.
- GST invoice automation.
- Advanced tax reports.
- Chatbot.
- Abandoned cart reminders.
- Loyalty and reward system.
- Advanced analytics.
- Support ticket system.
- Store pickup or click-and-collect.
- Multi-language support.
- Multi-currency support.
- Advanced audit logs.
- Advanced data backup automation.

5. Customer / B2C Features Confirmed in Phase 1

- Customer registration.
- Customer login.
- Customer profile basics.
- Homepage browsing.
- Category browsing.
- Product listing page.
- Product search.
- Basic product filtering.
- Product detail page.
- Product image viewing.
- Product description viewing.
- Product price viewing.
- Product stock status viewing.
- Seller details viewing.
- Vendor/store profile page viewing.
- Wishlist or saved products.
- Add to cart.
- Cart management.
- Checkout flow.
- Order placement.
- Order history.
- Basic order tracking.
- Live delivery tracking.
- Store pickup or click-and-collect.

- Advanced buyer-seller chat.
- Support ticket system.
- Chatbot support.
- Abandoned cart reminders.
- Loyalty and reward system.
- Mobile-friendly shopping experience.
- Basic payment gateway readiness.
- Online payment support if the payment provider account is approved.

- Homepage content management.
- Policy page management.
- Order management.
- Basic order status management.
- Basic sales report.
- Basic seller report.
- Basic product report.
- Basic enquiry report.
- Advanced analytics.
- Advanced tax reports.
- GST invoice automation.
- Automated seller payout control.
- Seller subscription plan management.
- Paid seller promotion management.
- Buyer-seller chat monitoring.
- Support ticket management.
- Loyalty and reward system management.
- Multi-language management.
- Multi-currency management.
- Advanced audit logs.
- Advanced data backup automation.
- Manual commission setup.
- Percentage-based commission setup, if finalized in Phase 1.
- Basic support enquiry management.

9. Payment and Billing Scope Confirmed in Phase 1

- Payment gateway readiness will be provided.
- Online payment can be enabled only after payment provider approval.
- Cash on delivery can be added only if the client approves it.
- Manual bank transfer confirmation can be added only if the client approves it.
- Payment gateway transaction charges are not included in the development budget.
- Payment provider setup charges are not included in the development budget.
- Customer order receipt or invoice format will be finalized during requirement confirmation.
- Seller commission will be handled manually or by configured percentage in Phase 1.
- Automated seller payout is included in Phase 1.
- Seller payout history is included in Phase 1.
- GST invoice automation is included in Phase 1.
- Advanced tax reports are included in Phase 1.

10. Delivery and Shipping Scope Confirmed in Phase 1

- Basic delivery status management will be included.
- Manual order status update will be included.
- Shipping partner details can be collected from the client.
- Courier API integration is included in Phase 1.
- Live delivery tracking is included in Phase 1.
- Store pickup or click-and-collect is included in Phase 1.
- Courier partner charges are not included in the development budget.

11. Content and Policy Pages Confirmed in Phase 1

- Homepage content.
- Category content.
- Product content.
- Seller/store content.
- Contact page.
- Privacy policy page.
- Terms and conditions page.
- Refund or return policy page.
- Seller policy page, if required.
- Support information, if required.

12. Mobile App Scope Confirmed in Phase 1

Mobile app development is included in the expanded Phase 1 scope.

The mobile app will use the same backend, products, sellers, customers, orders, payments, and admin controls as the website.

Confirmed mobile app scope includes:

- Android customer app.
- iOS customer app.
- Seller mobile app or seller mobile dashboard.
- Same website login in app.
- Same product data in app.
- Same customer data in app.
- Same seller data in app.
- Same order data in app.

- Order tracking in app.
- Push notifications.
- Play Store publishing support.
- App Store publishing support.

13. Advanced Features Confirmed in Phase 1

- Android mobile app.
- iOS mobile app.
- Dedicated seller mobile app.
- Advanced buyer-seller chat.
- Courier API integration.
- Live delivery tracking.
- Automated seller payouts.
- Seller subscription plans.
- Paid seller promotions.
- Advanced B2B RFQ workflow.
- Quotation comparison.
- PO upload workflow.
- B2B approval workflow.
- Special business pricing rules.
- GST invoice automation.
- Advanced tax reports.
- Chatbot.
- Abandoned cart reminders.
- Loyalty and reward system.
- Advanced analytics.
- Support ticket system.
- Store pickup or click-and-collect.
- Multi-language support.
- Multi-currency support.
- Advanced audit logs.
- Advanced data backup automation.

14. Items Not Included in Phase 1 Budget

- Domain purchase or renewal.
- Hosting or server charges.
- Payment gateway transaction charges.
- Payment provider setup costs.

- SMS service charges.
- WhatsApp service charges.
- Email service charges.
- OTP service charges.
- Push notification service charges.
- Courier API service charges.
- Logistics partner charges.
- Google Play Store developer account charges.
- Apple App Store developer account charges.
- Payment gateway merchant account approval delays.
- Courier partner account approval delays.
- App Store or Play Store approval delays.
- Third-party API subscription fees.
- Any feature beyond the expanded Phase 1 scope listed in this document.

15. Required Details From Client

The client must provide the following details before or during the requirement collection stage:

- Business name.
- Logo.
- Brand colors.
- Contact number.
- Email address.
- Business address.
- Product categories.
- Sample product list.
- Product images.
- Product prices.
- Product stock details.
- Initial vendor or seller details.
- Seller onboarding rules.
- Payment gateway details, if available.
- Shipping partner details, if available.
- Courier partner account details, if available.
- Google Play developer account details, if Android app publishing is required.
- Apple developer account details, if iOS app publishing is required.
- SMS, WhatsApp, email, OTP, and push notification service details, if required.
- B2B RFQ and quotation approval rules.
- Seller payout and commission rules.
- GST and tax invoice rules.

- Multi-language requirements, if required.
- Multi-currency requirements, if required.
- Return and refund policy.
- Seller terms.
- Privacy policy content, if already available.
- Terms and conditions content, if already available.
- Social media links, if required.
- Homepage banner content, if available.

16. Estimated Timeline

The Phase 1 timeline depends on client feedback, content availability, mobile app scope, payment gateway approval, courier integration approval, app store approval, and third-party service approval.

- Requirement confirmation and planning: To be finalized after full expanded scope approval.
- UI design and client approval: To be finalized after screen list confirmation.
- Website frontend and backend development: To be finalized after final feature confirmation.
- Android and iOS mobile app development: To be finalized after app scope confirmation.
- Third-party integration work: To be finalized after account/API availability.
- Testing, corrections, and final review: To be finalized after development scope confirmation.
- Launch preparation: To be finalized after client content and accounts are ready.

The earlier starter timeline is not final for the expanded Phase 1 scope because advanced features and mobile apps are now included.

17. Payment Terms

- 40% advance payment to start the project.
- 30% after UI design and first working demo approval.
- 30% before final deployment and handover.

18. Change Request Rule

Any feature or change not listed in this document will be treated as an extra request.

Extra requests may affect:

- Project cost.
- Project timeline.
- Development priority.
- Testing scope.

- Final delivery date.

No extra feature will be added without client discussion and approval.

19. Client Confirmation

By approving this document, the client confirms the Phase 1 website scope, budget, timeline, payment terms, and excluded items.

The client also confirms that mobile app development and advanced marketplace features are included in the expanded Phase 1 scope.

The client understands that the expanded Phase 1 scope requires final budget and timeline reconfirmation before development starts.
